EDUCATION

Mohan Babu University

2024 - 2028

Bachelor of Data Science

CERTIFICATIONS

- STEP CERTIFICATE
- Java Foundation-oracle
- Linux Fundamental - Google Developer

SKILLS

- JAVA
- PYTHON
- SQL
- REACT JS
- WEB DEVELOPMENT
- AI CHATBOT

PROFILE

Data Science student who loves turning data into solutions. Proficient in Python and constantly learning new tools through personal projects. Looking for an opportunity to collaborate with experienced professionals, grow my skills, and make a real-world impact.

PROJECTS

Hardware Monitor - A real-time system performance monitoring desktop app

Tech: Electron, React, TypeScript, and Vite.

- Built a real-time system performance monitoring desktop application using Electron, React, and TypeScript.
- Implemented dynamic chart visualizations to track live CPU, RAM, and storage utilization directly from the system tray.
- Designed a secure and efficient architecture using IPC preload scripts to connect the backend monitoring logic with the frontend UI.

ELLI - AI Assistant -Everyday Lightweight Learning Intelligence

Tech: Python, ChromaDB, Nvidia API, Semantic Search

- Built a lightweight, Python-based AI Assistant using Ollama (Llama 3.2) and Groq API, featuring autonomous function calling and natural language interaction.
- Integrated multi-modal capabilities including voice control, real-time web data extraction (SerpAPI, NewsAPI), and macOS system management to automate daily tasks.
- Designed a persistent memory system to retain user context and streamline workflows seamlessly through a conversational interface.
